

## SAFETY DATA SHEET

Issue date: 19 January 2021

Supersedes date: 7 September 2015

# Section 1: Identification of the substance/mixture and of the company/undertaking

| 1.1 Product identifier             | Linseed Oil Soap  |
|------------------------------------|---|
| 1.2 Relevant identified uses of    | For washing and cleaning purposes. Most suitable          |
| the substance or mixture and       | identified uses:  |
| uses advised against               | Sector Use - SU:  |
|                                    | SU19 Building and construction work                       |
|                                    | SU20 Health services                                      |
|                                    | SU21 Private households (= general public = consumers)    |
|                                    | SU22 Professional uses: Public domain                     |
|                                    | Process categories [PROC]:                                |
|                                    | PROC10. Roller application or brushing                    |
|                                    | PROC11 Non industrial spraying                            |
|                                    | PROC19 Hand-mixing with intimate contact and only PPE     |
|                                    | available   |
|                                    | Environmental Release Categories:                         |
|                                    | Wide dispersive outdoor use of processing aids in open    |
|                                    | systems   |
| 1.3 Details of the supplier of the |   |
| safety data sheet                  |   |
| Supplier/Importer EU               | Allbäck Linoljeprodukter AB                               |
| Address                            | Östra Balkåkravägen 18                                    |
|                                    | SE-271 91 Ystad   |
|                                    | Sweden  |
| Telephone number                   | +46-411-602 02  |
| Contact person                     | Sonja Allbäck   |
| e-post                             | allback@allbackpaint.com                                  |
| 1.4 Emergency telephone            | 24 hours service is available at www.nhs.uk               |
| number                             | Call 112 or 999 if an acute emergency. If less acute call |
|                                    | 111.  |
| SDS issued by                      | Ann Martens, Ramböll Sverige AB, +46 (0)10-615 54 47      |

## Section 2: Hazards identification

2.1 Classification of the substance or mixture Not classified as hazardous for health or environment.

2.2 Label elements No hazard label required.

2.3 Other hazards

None specific.

### Section 3: Composition/information on ingredients

| EC-no     | CAS-no     | Reg-        | Name of          | Conc.   | Classifi- | Com. |
|-----------|------------|-------------|------------------|---------|-----------|------|
|           |            | no          | component        | wt/wt   | cation    |      |
|           |            | REACH       |                  |         |           |      |
| 268-920-7 | 68154-76-7 | See section | Linseed oil soap | 15-45 % | -         | -    |
|           |            | 16.         |                  |         |           |      |
| 231-791-2 | 7732-18-5  | -           | Water            | 55-85 % | -         | -    |

Explanation of abbreviations:

CAS-nr. = Chemical Abstracts Service; EU-no (Einecs- or Elincsnumber) = European Inventory of Existing Commercial Chemical Substances or European L1st of Notified Chemical Substances. Content specified as; %, %wt/wt, %vol/vol, mg/m<sup>3</sup>, ppb, ppm, wt%, vol%.

WEL = The product has a workplace exposure limit, PBT = The product is declared since it's a PBT- or a vPvBsubstance.

Comments: Linseed oil soap contains sodium salt of mainly natural triglycerides from oleic, linoleic, palmitic acid, linolenic acid and stearic acid. CAS 8554-56-3 is also possible for the product.

For risk phrases in plain text, see section 16.

#### Section 4: First aid measures

| 4.1 Description of first aid     |  |
|----------------------------------|--|
| measures                         |  |
| Inhalation                       | Not relevant, except when spraying the product. If       |
|                                  | irritation occurs, move to fresh air and rest.           |
| Skin contact                     | Wash the skin with water.                                |
| Eye contact                      | Remove contact lenses. Rinse the eyes for a couple of    |
|                                  | minutes. If symptoms persist, seek a physician.          |
| Ingestion                        | Drink copious amounts of milk. The product is a laxative |
|                                  | in large amounts, but no risk for intoxication.          |
| 4.2 Most important symptoms      |  |
| and effects, both acute and      |  |
| delayed                          |  |
| Inhalation                       | May cause some transient irritation to the respiratory   |
|                                  | tract.   |
| Skin contact                     | Has no effect on skin.                                   |
| Eye contact                      | Provides transient mild irritation.                      |
| Ingestion                        | Laxative.  |
| 4.3. Indication of any immediate | Access to water for rinsing eyes at the working place.   |
| medical attention and special    |  |
| treatment needed                 |  |
|                                  |  |

## Section 5: Firefighting measures

| 5.1 Extinguishing media          |   |
|----------------------------------|---|
| a. Recommended Extinguishing     | a. The product cannot be ignited due to high water      |
| media                            | content. For surrounding fire use powder, foam, carbon  |
| b. Not Recommended Extinguishing | dioxide or water spray depending on what is burning.    |
| media                            | b. Foam containing substances that are harmful for the  |
|                                  | environment, i.e. Perfluoro octane sulfonate (PFOS) and |

|                                  | Nonyl ethoxylate.                                  |
|----------------------------------|--|
| 5.2 Special hazards arising from | None   |
| the substance or mixture         |  |
| 5.3 Advise for firefighters      | Wear a self-contained breathing apparatus for fire |
|                                  | fighting if necessary.                             |

## Section 6: Accidental release measures

| 6.1 Personal precautions,          |   |
|------------------------------------|---|
| protective equipment and           |   |
| emergency procedures               |   |
| 6.1.1. For non-emergency personnel | For personal protection equipment see section 8. Wash   |
|                                    | skin or contaminated clothes with water.                |
| 6.1.2 For emergency responders     | Wash with water.  |
| 6.2 Environmental precautions      | Prevent discharge to the sewage system.                 |
| 6.3 Methods and material for       | Make embankments with sand or other inert absorbent     |
| containment and cleaning up        | and collect. Small amounts can be washed away with      |
| 6.3.1. Surrounding embankment      | water. The product is easily biodegradable in nature.   |
| /sealing                           |   |
| 6.3.2 Recommended cleaning up      |   |
| measures                           |   |
| 6.3.3 Non-recommended measures     |   |
| 6.4 Reference to other sections    | For personal protection, see section 8. For disposal of |
|                                    | waste, see section 13.                                  |

## Section 7: Handling and storage

| 7.1 Precaution for safe handling                                   | Avoid spills and prevent large quantities of the product to<br>reach sewage system or surface water. Avoid eating,<br>drinking and smoking in the working area. Wash hands<br>after using the product. Remove contaminated clothing<br>before meals. |
|--|--|
| 7.2 Condition for safe storage,<br>including any incompatibilities | Store the product at room temperature. Store out of reach of children and away from food.  |
| 7.3 Specific end use(s)  | No specific end uses.  |

## Section 8: Exposure controls/personal protection

8.1 Control parameters

No national occupational exposure limits values.

PNEC and DNEL/DMEL

No values established.

| Biological limit values  | None |
|--------------------------|------|
| Recommended surveillance | None |
| procedure                |      |

| 8.2 Exposure controls         | 1   |
|-------------------------------|---|
| 8.2.1 Recommended technical   | None  |
| control measures              |   |
| 8.2.2 Individual protection   |   |
| measures, e.g. personal       |   |
| protection equipment          |   |
| Eye/face protection           | None. Use safety goggles when spraying the product.         |
| Skin protection               | i) None.  |
| i) Hand protection (material, | ii) Normal working clothes. No special                      |
| thickness, breakthrough time) | protection.   |
| ii) Other protection          |   |
| Respiratory protection        | If spraying the product one can use a half mask with        |
|                               | particle filter P2 (for oil aerosols) and filter A (organic |
|                               | vapours).   |
| 8.2.3 Environmental exposure  | Avoid large leakage to surface water or sewage system       |
| control                       |   |

### Section 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

| Appearance/Form /State            | Liquid   |
|-----------------------------------|--|
| Odour                             | Characteristic soap or linseed oil.                        |
| рН                                | 10 (concentrated product)                                  |
| Melting point/freezing point      | Appr. 0 °C   |
| Initial boiling point and boiling | Appr. 100 °C   |
| range                             |  |
| Flash point                       | Not relevant.  |
| Evaporation rate                  | Not determined   |
| Flammability                      | Not determined   |
| Upper/lower flammability or       | Not determined   |
| explosive limits                  |  |
| Vapour pressure                   | Not determined   |
| Vapour density                    | Not determined   |
| Relative density                  | 0.99 kg/l  |
| Solubility                        | Linseed soap is miscible with water. The product is partly |
|                                   | soluble in several solvents, but it is not recommended to  |
|                                   | mix with organic solvents.                                 |
| Partition coefficient n-          | Not determined   |
| octanol/water                     |  |
| Decomposition temperature         | Not determined   |
| Viscosity                         | Not determined   |
| Explosive properties              | None   |
| Oxidizing properties              | None   |

#### 9.2 Other information

## Section 10: Stability and reactivity

| 10.1 Reactivity | The product is not reactive during normal handling and |
|-----------------|--|
|                 | storage conditions.                                    |

| 10.2 Chemical stability       | Stable at normal storing conditions                  |
|-------------------------------|--|
| 10.3 Possibility of hazardous | None   |
| reactions                     |  |
| 10.4 Conditions to avoid      | Do not store above normal room temperature and below |
|                               | + 4 °C   |
| 10.5 Incompatible materials   | Strong acids, bases and oxidizing agents.            |
| 10.6 Hazardous decomposition  | None   |
| products                      |  |

## Section 11: Toxicological information

Substances

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

a) Acute toxicity

Short term exposure:

Ingestion: The product is probably a mild laxative and ingestion of small amounts will not give any symptoms.

Inhalation: Not relevant. Only a risk when spraying the product. The product could in that case cause minor irritation to respiratory tracts.

Eye contact: Could cause mild transient irritation if contact with the eyes

Skin contact: Gives no effect on the skin

Long term exposure:

Ingestion: For linseed soap data is lacking.

Inhalation: For linseed soap data is lacking.

Eye contact: Repeated exposure may cause irritation to the eyes, but will probably not give any remaining effect on the eye.

Skin contact: Repeated contact might dry the skin and cause irritation or atopic eczema, but during normal use the risk is low.

b) Skin corrosion/irritation: The product is not corrosive to the skin.

- c) Serious eye damage/irritation:
- The product will not give serious eye damage or eye irritation.

d) Respiratory or skin sensitisation: The product is not a sensitizer. There is no known

- sensitizing effect of linseed oil soap, but no data is found.
- e) Germ cell mutagenicity: No known effects.
- f) Carcinogenicity: No known effects.
- g) Reproductive toxicity: No known effects.
- h) STOT-single exposure: No known effects.
- i) STOT-repeated exposures: No known effects.
- j) Aspiration hazard: No known effects.

#### 11.2. Information on other hazards

#### Section 12: Ecological information

#### 12.1 Toxicity

Acute toxicity

Linseed oil has low toxicity for aquatic organisms and this is probably also the case for linseed soap.

Long term toxicity

The product will probably not have any adverse long term effects on the aquatic environment, but data is lacking.

Terrestrial organisms: The product is probably not harmful for terrestrial organisms, but data is lacking.

Plants: The product is probably relatively harmless for plants, but data is lacking.

Effects on micro-organisms living in wastewater treatment plants: The product has no known effect on microorganisms in wastewater treatment plants.

12.2 Persistence and degradability

Linseed oil is easily degradable, but data is lacking for linseed oil soap. It is also with high probability easily degradable.

12.3 Bioaccumulative potential

The product will not bioaccumulate.

12.4 Mobility in soil

The product is water soluble but probably easily degradable and thus the mobility in soil will not be so high.

12.5 Results of PBT and vPvB assessment

Section 13: Disposal consideration

The product does not contain any PBT or vPvB substances.

12.6. Endocrine disrupting properties

None known.

12.7. Other adverse effects

| 13.1 Waste treatment methods                                     | <ul> <li>a) Emptied plastic packages are sorted as hard plastic.<br/>The packaging consists of polypropylene.<br/>The product can be incinerated in a suitable<br/>incineration plant holding a permit delivered by the<br/>competent authorities.</li> <li>b) There are no physical/chemical properties that may<br/>affect the waste treatment solutions.</li> <li>c) Larger residues should not be released to the<br/>sewage system. No special security measures<br/>concerning waste treatment methods are needed.</li> </ul> |
|--|---|
| Waste codes (EWC)  | Depends where the waste is produced, but suitable codes are 07 01 99 or 08 01 17.   |
| The product is classified as hazardous waste                     | No.   |
| Waste codes (EWC) for the container                              | Suitable code for the packages are 20 01 39.  |
| A not thoroughly cleaned container is considered dangerous waste | No  |
| Other information  | See section 8 for personal protective equipment.  |
| Other Information  | See section 8 for personal protective equipment.  |

## Section 14: Transport information

| General                            | Not classified as hazardous goods |
|------------------------------------|-----------------------------------|
| 14.1 UN number                     | -                                 |
| 14.2 UN Proper Shipping Name       | -                                 |
| 14.3 Transport hazard class(es)    | -                                 |
| 14.4 Packing group                 | -                                 |
| 14.5 Environmental hazards         | -                                 |
| 14.6 Special precautions for users | -                                 |
| 14.7 Maritime transport in bulk    | -                                 |
| according to IMO instruments       |                                   |

#### Section 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

No relevant.

15.2 Chemical safety assessment

Chemical safety assessment is not made for linseed soap as it is exempted from registration according to REACH.

#### Section 16: Other information

This SDS is changed in the following sections: Headlines in some sections according to Regulation (EU) 2020/878. Changes in section 12.

Sources for data in this SDS

- The manufactures' SDS
- European Commission DG Environment Report October 2008 from DHI. Review of Annex IV of Reg. 1907/2006 Contract No. 070307/2007/473055/MAR/D1 and appendix 2 Evaluation of existing entries, Linseed oil.
- IMO INTERNATIONAL MARITIME ORGANIZATION. BLG WORKING GROUP ON THE EVALUATION OF SAFETY AND POLLUTION HAZARDS OF CHEMICALS. 30 September 2005, Linseed oil (containing less than 4 % free fatty acids). Submitted by the United Kingdom.

Other information:

Sodium salts of natural fatty acids (eg. linseed oil) are exempted from registration according to REACH. See regulation EC 987/2008.

The safety data sheet is based on the REACH regulation EC 1907/2006 and amendments. Classification according to the CLP regulation EC 1272/2008.
